

ABOUT ME

PETER CSIKOS

FRONT-END DEVELOPER

<https://github.com/dekztah>
<https://linkedin.com/in/dekztah>
hi@dekztah.org

Hi! I'm a front-end developer / music lover / world traveler who was born in Hungary, but lived in several parts of the world for shorter and longer periods.

I have been working remotely for 5 years now. Before I became a front-end developer, I started in graphic design as I have good eyes for aesthetics. I made my first website in 1998.

Nowadays I work with vuejs, using Google Cloud Platform, and sometimes a little bit of nodejs.

I am looking for a long term (senior) front-end role with vuejs which is 100% remote.

WORK EXPERIENCE

2020 →

WEB & MORE

SENIOR FRONT-END DEVELOPER

vuejs / nuxt / pug / tailwind / webpack / ES6

Various vuejs projects using nuxt and tailwindcss.

OTHER PROJECTS

LEMBONGAN INFORMATION PAGES

A hobby project made in vue.js, using google firebase for data storage and database. Actively maintained and developed till this day.

Goal of the project was to gather all services, restaurants, activities and boat schedule of the small island of Lembongan (Indonesia) in one place, thus helping out struggling local businesses during the COVID-19 pandemic.

repository link: <https://github.com/dekztah/lembongan>
site link: <https://lembongan.today>

VUESUALIZE WORKFLOW APP

Vuejs project with 2 other front-end developers during my bench time at Inviqa. Goal of the project was to ease the process of creating user journeys, to visualize workflow. Backend is google firebase and firestore.

repository link: **private, access upon request**
site link: <https://vuesualize-app.firebaseio.com>
